Front End Developer

"Every problem has a solution, those willing to persevere through failure will most surely find it."

PROFESSIONAL PROFILE

Focused and solutions-oriented developer currently working with React, Redux, Node, Express and MongoDB. Avid, teachable learner, willing to take on any challenge given the opportunity. Seeking a transition from business operator to full-time Front End Engineer within a growing organization.

- ➢ 2 years' experience developing websites & single page applications SPAs.
- ➢ Leverages modern front-end frameworks & libraries to rapidly build usable applications.
- ➢ Sets achievable goals for each project, allowing for high-levels of productivity and control throughout the project life-cycle.
- ➢ Performs industry evaluation and analysis, implementing lessons learned and innovative methodology.
- ➢ Tests code in multiple browsers to ensure cross-browser compatibility.
- ➢ Proven track record of passionately pushing the limit to learn new technologies & adapt to current trends.
- ➢ Engages in weekly mentoring sessions to give back to the coding community.

Git, GitHub, Bitbucket	Webstorm	NPM, Heroku, Adobe (Illustrator, Photoshop, & After Effects), CorelDRAW

CAREER HISTORY

Front-End Engineer, *SELF-EMPLOYED,* Dallas, TX   2016 TO PRESENT

Projects Portfolio | Github

- ➢ **National Park Finder** - A React app that returns results by state using the National Parks Service API. Find your next adventure here!
- ➢ Party Planet – A React/Redux app that allows the user to build an order of party supplies. Inventory levels/costs are maintained throughout the order process and user can return items upon viewing/closing completed orders.
- ➢ Random Speller – A React app that connects to the WordsAPI and generates random words with definitions to practice spelling. Voice is provided by the ResponsiveVoice API.
- ➢ Project Math - An app that generates random math problems based upon selections of operation and difficulty level. This project makes use of template literals and conditional rendering to behave as a SPA. No framework was used for Project Math.
- ➢ **Homeschool Hub** - (In development) Front-end built with React, React Router, Redux, SCSS. Connects to custom API built with Node.JS, Express and MongoDB. Tracks information for homeschooling families and individuals, enabling the user to setup and maintain records for their students.
- ➢ Be sure to check out my Github for additional projects.

Owner, *DERRINGER CONSTRUCTION*, Dallas, TX   2014 TO PRESENT

- Perform building, roofing and remodeling services as well as general contractor maintenance.
- Provide detailed work scope and bids per customer needs.
